SERVICE BULLETIN

GAME: EIGHT BALL DELUXE LIMITED EDITION

SUBJECT: LAMP BALLAST

Problem: The fluorescent lamp ballast used in some of the Eight Ball Deluxe Limited Edition games is providing too much power to the fluorescent lamp, resulting in its premature failure. You will know if you have this ballast, if it is black in color with a General Electric catalog number 89G457 and a Bally/Midway part number of 0017-00003-0026.

Solution: The Bally/Midway Parts Dept. will provide you with the proper ballast which is silver in color and made by Schumaker Electric; their part number B6-8, Bally/Midway part number 0017-00003-0480. This part will be sent to you on an advance replacement basis. You can order the part from Bally/Midway and you will be billed pending the return of the black General Electric ballast, at which time your account will be credited. If you have any questions regarding this change please call the pinball service at 800-323-3555.
